WIP deters repeat DWI offenses

By JILL LARCOMB

Associate Writer

The Weekend Intervention Program at the School of Medicine continues to succeed in deterring repeat DWI offenders since the program started in 1978, according to Phyllis Cole, Education Director of the WIP program.

The program's goals are assessment and education of the offender, according to Cole.

"The first is assessment, meaning determination and recording information on where the offenders are with their use of alcohol."

"The second goal is just education," Cole continued. "To complete these goals we have a variety of films and lectures and through small group counseling, we perform the assessment process."

Sometimes the clients are recommended to attend Alcoholics Anonymous meetings. Cole said, "WIP is not a treatment program, like AA). We are providing a service to the courts to help them with an offender."

"The individuals come and go through the process—we determine what would be a good way to help them," Cole said.

Cole said the directors of the WIP program think the program is working. "We have not followed up on the information in the last study 1985. We do believe that the program is still successful in preventing repeat offenses of driving while intoxicated."

Lou Emm to host Credit Union meeting

As one of the 4,530 Wright-Patterson Credit Union members of the Wright State University community, you can go to the annual credit union's membership meeting tonight at 7 p.m., in the Physical Education Building.

Dayton radio personality Lou Emm, longtime voice of credit unions in the Miami Valley, will host the meeting and Chairman Peter L. Pointer will officiate.

Members must present a WPCU membership card to gain admittance.

Credit Union membership includes 116 WSU graduate students, 370 alumni, 1,348 students, and 2,696 WSU employees.

Wright-Patt is Ohio's largest credit union and has over 125,000 members and over \$47 million in assets.

Enjoy the warmer weather and the attractions at the Wright-Patterson Air Force Museum.

Job seekers need resourcefulness and initiative to make most of opportunities

Continuing economic growth and low unemployment are creating an increasing number and variety of opportunities for summer job seekers this year.

But even with the favorable odds, students and others looking for summer work will have to use resourcefulness and initiative to make the most of those opportunities.

Mitchell S. Fromstein, President and CEO of Manpower Inc., which expects to fill more than 100,000 temporary job openings this summer, offers these tips for job seekers:

1. **Start Early:** An early start will give you an edge for the job you want most. But don't be discouraged if it takes a while to line up a job. Many firms don't complete their hiring until the end of May.

2. **Explore All Potential Job Sources:** Newspaper ads are a good source of job leads, but so are relatives, teachers and friends. Call major firms and inquire about openings; contact temporary help service firms; check with government job service offices; and be sure to call your former employers.

3. **Apply in Person:** Phone calls may not

get past a company's switchboard, and messages may not catch the attention of the people you want to meet. Dress appropriately, even if you're just stopping by to pick up an application—you never know who you may meet in the lobby.

4. **Be Honest:** Claiming to be an expert word processing operator when you're only a beginner can make for a frustrating summer. You won't enjoy a job that calls for a level of skill far beyond you own. And, you could be dismissed when the deficiency becomes obvious.

5. **Look for Learning Opportunities:** Present yourself as someone eager to learn; you may land a job where you can develop skills in word processing, computer operation or special business practices. Recent graduates who show this kind of initiative can increase the chances that a summer job will become permanent.

6. **Have Proper Legal Identification:** You must have a passport, Social Security card or pictured driver's license to prove citizenship under the Immigration Law. Lack of identi-

fication will delay your job search.

7. **Make Commitments and Keep Them:** Employers want assurance that you will hang in for the duration of a summer job, not disappear in mid-July. Replacing workers is costly and difficult for businesses. Leaving an employer in the lurch could destroy your valuable contacts.

Child killer found guilty but mentally ill

A Muskegon, Michigan, man was sentenced to life in prison for incinerating his two young sons in a 13-hundred-degree ladle at the foundry where he worked. A jury last week found Bartley Dobben guilty but mentally ill on two murder counts in the Thanksgiving Day 1987 killings of his pre-school-age sons. Security guards say Dobben left the plant 10 minutes after entering, telling them he had put the children into a foundry ladle and turned on the gas jets.

sports

Lacrosse team whips Toledo, preps for WPAFB

By TODD M. BUNNELL

Sports Editor

Before the rain came, the goals poured at Wright State Field Number 4 last Saturday afternoon. The WSU lacrosse team bounced Toledo 15-4 to raise their record to 7-6 on the season.

The Raiders set the tempo early when Eamon "E-man" Costello thwarted Rocket Mike Cravens at the 7:29 mark of the first quarter. Costello's legal check knocked Craven backwards,

stopping the game for a few minutes. Two minutes later, Eric "Slam" Nordquist slammed in the first of his four goals to give WSU a 1-0 lead.

"He just had his head down and wasn't watching what the hell he was doing," Costello said. Toledo brought the minimum ten players so they couldn't afford to lose anybody.

"That probably helped us because they only had ten players," Costello said.

Only in lacrosse, though,

would a fan see a player switch sides. Out of good sportsmanship, WSU put Bill Fischer and Alan Pitstick on "waivers," letting them platoon for the Rockets.

In the second quarter, Toledo tied things up with a power-play goal from Jerry Cukowski.

Kevin Messner hit an unassisted goal at the 7:25 mark to give Wright State a 2-1 lead. A minute later, Jose Rodriguez scored a goal.

At the 1:45 mark,

Nordquist slammed in another goal to give WSU a 4-1 edge.

With only three seconds remaining the half, Rodriguez, from a Fred Longo pass, found the net to give Wright State a 5-2 halftime advantage.

In the third quarter, Doug Krabal went wild, scoring three goals. His first came less than a minute into the second half. Only 19 seconds later, Rodriguez notched another goal with the help from an effective

pass from Longo.

Krabal scored at the 6:18 mark while Rodriguez scored at the 4:52 mark to give the Raiders a commanding 9-3 lead. Following a Toledo penalty, Krabal took a pass from Rodriguez and bounced the ball past Toledo goalie, Rob Dullar, at the 3:55 mark. WSU led 10-3.

After two assists, Longo finally got his chance to score at the 2:57 mark when shorthanded, he scampered down the field and flung the ball past the Toledo goalie.

Nordquist scored with 25 seconds left in the quarter to give WSU a 12-3 advantage.

Raider Pitstick, donned in Toledo gold, scored on his former teammate, Andy Sweetman, in the fourth quarter to bring UT to only a 12-4 deficit.

Nordquist scored his fourth goal in the fourth quarter.

The Raiders will next play in the Wright-Patterson tournament this weekend at the Dayton Riverfest to finish their season.

WSU looks for first winning season this weekend

After having a 0-9 first spring season and a 5-7 spring season, the WSU men's lacrosse club has the opportunity to have its first winning season May 28 at the Dayton Riverfest.

On Sunday, the team plays the Wright-Patterson AFB Wings at noon. The Raiders will be going into that game with a 7-6 record.

The Raiders are having an exceptional reason in their

third year. WSU had three disappointing losses to Miami of Ohio (11-9), Dayton (8-7 in overtime) and Kentucky (10-9) in overtime. The roster has fallen from 34 players to 17 players due to work schedules, class schedules and injuries.

Aside from these minor

problems, WSU was able to attend the Toledo Invitational and easily defeat Earlham (10-4), Heidelberg (9-5) and Toledo (16-1) to sweep the tournament and to give the Raiders three trophies: the first-place Championship trophy, the Team Sportsman-

ship award and Jose Rodriguez, player / coach, was awarded tournament MVP.

The Raiders currently possess the best talent collectively they have had in the three fall seasons and past two spring seasons. Goalie Andy Sweetman is having another good year with a 75 percent save record. At his side is the best defensive unit the Raiders have had with Chris Sperber, Carey Smith and defensive captain Andrew Albers.

This year the offense has really hustled with their new-found midfield unit consisting of Fred Longo, Kevin Messner and Eric Nordquist. Nordquist, playing his rookie spring season, has a 73 per-

cent faceoff win record.

Luckily, the Raiders have been able to keep their attack unit intact for the last two seasons. The Raiders have been attack strong in scoring since their founding three years ago. Rodriguez leads with 44 goals and 20 assists followed by Rusty Rouse with 30 goals and 15 assists. Doug Krabal has 18 goals and 6 assists.

Though WSU easily defeated Toledo (15-3) in their last outing, they were not up to their usually fast and aggressive game. Missing a few people to illness and injury, especially attackman Rouse, may have caught the Raiders off guard.

Cedar Point becomes a physics class for a day

A roller coaster in the classroom? That's what high school and middle school physics students will find at Cedar Point's Physics Day on Tuesday, May 23. "Acceleration" is the theme of this year's event at the Sandusky, Ohio amusement park. In the past four years, the event has grown from 400 to about 4,000 students and over 200 teachers.

Physics Day is an opportunity for students to apply what they've learned in classes and actually experience the physics that they have studied. Dr. Robert Speers, associate professor of physics at Firelands College, Huron, Ohio, coordinates the event. "In the classroom, students learn how to recognize, measure and use the principles of physics, such as velocity, acceleration and mass," Speers said.

"Cedar point is like a life-sized laboratory, where the students can feel the physics that they have only been able to look at in the typical school laboratory. Physics Day is learning in a fun and exciting environment, which inspires students to study more physics and other sciences."

Students work through an activity sheet of physics problems related to different rides in the park. They experience the ride to feel centripetal force, gravity, velocity and acceleration and make their calculations. Many teachers give classroom credit for solving the problems, which include determining the height, speed and angle of descent of roller coasters and estimating how far a person can see from the top of the Space Spiral.

"The 'Acceleration' theme was chosen because

Cedar Point's new attraction, *Magnum XL-200*, is the fastest roller coaster on Earth," Speers said.

"Acceleration is an important law of physics to understand." Past themes for Cedar Point Physics Days have featured structure and velocity.

Students won't be the only ones learning from Physics Day. Del Freeman, director of engineering at Arrow Dynamics, the company that engineered *Magnum XL-200*, will be the guest speaker for teachers. "We'll offer teachers a chance to learn something that they can bring back to the classroom," Speers said. "If you can teach an educator, you've taught a million."

Refreshment-stand seats become work tables, and students with protractors, compasses and pencils are seen

around the park. It may seem unusual to the average guest, but Physics Days like this one are held at nearly every major theme park in the country.

Physics Day events are recognized as a valid education activity by the American Association of Physics Teachers. The group has formed a Physics Day Committee to develop a standard text of physics problems that can be used at all amusement parks. Dick Heckathorn, a physics teacher at Midpark High School, Middleburg Heights, Ohio, and one of the originators of the Cedar Point event, is a member of the Physics Day Committee. "About 28,000 students across the country will participate in a Physics Day this year," Heckathorn said. "I can see Physics Days expanding to two-day events and to other subjects in the future."

Teachers who would like

their class to participate in Physics Day should contact Cedar Point at 419 / 627-2213 for more information about the activity and student ticket discount information.

Kinder-Care to present check

Thursday, May 25 at 2 p.m., Kinder-Care Learning Centers of the Dayton area will present a check for \$700 to the Dayton Ronald McDonald House. The house, located at 741 Valley View, serves as a home-away-from-home for the families of seriously ill children. Kinder-Care has held fundraising campaigns bene-

fitting the Ronald McDonald House for seven years. Children participate in various projects throughout the year to raise the funds. This year, the donation is earmarked to purchase new kitchen appliances for the house.

Several children from each of the 12 Dayton area Kinder-Care Centers will be on hand to assist the center

directors with the check presentation. Accepting the generous donation on behalf of the Ronald McDonald House will be several board members and Ronald McDonald himself.
